– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application was filed 11/19/2003 and claims benefit of Provisional Application 60/446,668 (2/11/2003) which claims benefit of Germany 102 56 080 (11/29/2002). Claims 1-15 are before the Examiner.

Claim Rejections - 35 USC § 112

1. Claim 9 remains rejected under 35 U.S.C. 112, second paragraph, as stated in paper dated 6/13/2005, because claim 9 still remains drawn to a composition of formula 1 and formula 2. Correction is required.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 02/45703 and WO 00/75114.

WO 02 teaches the combination of two active ingredients to treat obstructive or inflammatory airway disease. WO 02 teaches propellants, inhalable forms, dispersions, nebulizers, particle size and weight ratios. The first compound of the combination is the compound of the instantly claimed formula 2'. The second is a corticosteroid, which is not the instantly claimed formula 1, but which is in the same family as the instantly claimed formula 1.

WO 00 teaches compounds of formula (I) that encompass the instant claimed formula 2' to treat obstructive or inflammatory airway diseases in combination with other active ingredients such as tiotropium bromide (see page 17) for use as an inhalant or solid drug. WO00 does not specifically teach the instant compound of formula 2' but teaches formula (I) with a small Markush using formula (III) that would make the instant compound obvious.

WO 02 teaches a combination of two active ingredients to treat obstructive or inflammatory airway diseases.

It would have been obvious to one of ordinary skill in the art to use the compound of the instantly claimed formula 2' as taught by WO 02 with a tiotropium (instantly claimed formula 1) as taught by WO 00 to treat obstructive or inflammatory airway diseases. Rationale: WO 00 teaches a Markush that encompasses the instantly claimed formula 2' plus tiotropium to treat obstructive or inflammatory airway diseases and WO 02 teaches the instant claimed 2' in combination with another active ingredient to treat obstructive or inflammatory airway diseases.

The combination of the two references would have been within the skill of the ordinary artisan without the use of hindsight.
